

PIPELINE SMOKE TEST

Delete this document, and scripts/smoke.js, once the real generators build clean.

WHAT THIS PAGE PROVES

If this document rendered, the whole chain works: docx-js produced a .docx, transplant.py applied the visual template, LibreOffice converted it to PDF, Ghostscript rewrote it, and normalize_pdf.py stripped the per-run randomness. If tools/build.sh also reported “all documents verified clean,” then no escape sequences leaked into the output and no template font was silently substituted.

Build it twice and compare the bytes. They must be identical — that is what makes the git history stay clean when a document has not actually changed.

EVERY RENDERING PATH, EXERCISED

Bullets: this is one, produced by the BUL helper.

Bold leads: the lead is bold, the rest is roman, and the helper puts the space in the right place.

A bullet with no lead, for continuation points.

THE DM MARKER CONVENTION

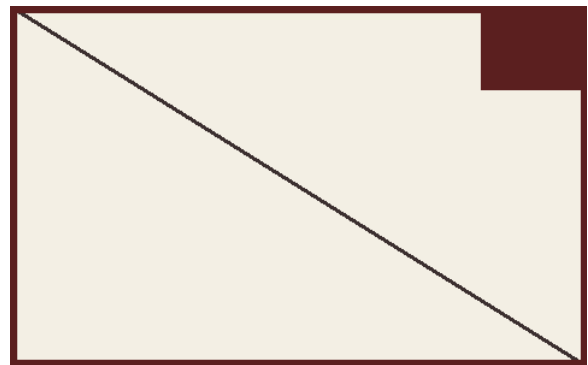

DM Only: the marker is bold and book-red; the prose after it stays roman. Colour is preattentive — a DM spots red without reading — and leaving the body roman matters because these notes run long. Colour the marker, not the prose. Italic is reserved for read-aloud, quotations, and epigraphs, and overloading it makes both signals ambiguous. Note also that the marker segment carries its own trailing space and the segment after it never begins with one, because the Markdown shim appends a space after every bold run.

READ-ALoud

Boxed text renders in italic on a tinted ground, indented from both margins. This is where the players hear the scene, and it is the one place italic is doing its intended job.

AN IMAGE

Artwork in images/ reaches the published document through ImageRun on the docx side and a Markdown link in the corpus. The test card below has a border, a diagonal, and a filled top-right corner, so a scaling, aspect-ratio, or orientation error is visible at a glance.

A TABLE

This one is marked full-width, so it spans both columns instead of wrapping to three words a line in the two-column body.

Check	What it catches	Must be
grep -Pc non-ASCII	Literal typographic characters in the generator source	0
pdftotext grep -c escape	Escape sequences leaking into the rendered output	0
pdf fonts grep -c DejaVu	A template font missing and silently substituted	0
Second build, cmp	Per-run randomness the normalizer failed to strip	identical

A STAT BLOCK

Test Construct

Medium construct, unaligned — exists only to prove the SB helper renders

Armor Class: 15 (plated)

Hit Points: 27 (5d8 + 5)

Speed: 30 ft.

STR	DEX	CON	INT	WIS	CHA
14 (+2)	12 (+1)	13 (+1)	3 (-4)	10 (+0)	1 (-5)

Senses: blindsight 30 ft., passive Perception 10

Languages: understands its instructions; cannot speak

Challenge: 1 (200 XP)

Immutable Form. The construct is immune to any spell or effect that would alter its form.

ACTIONS

Slam. Melee Weapon Attack: +4 to hit, reach 5 ft., one target. Hit: 6 (1d8 + 2) bludgeoning damage.

~

Pipeline proved. Now go and decide what the campaign is about.
